

## XPO

---

---

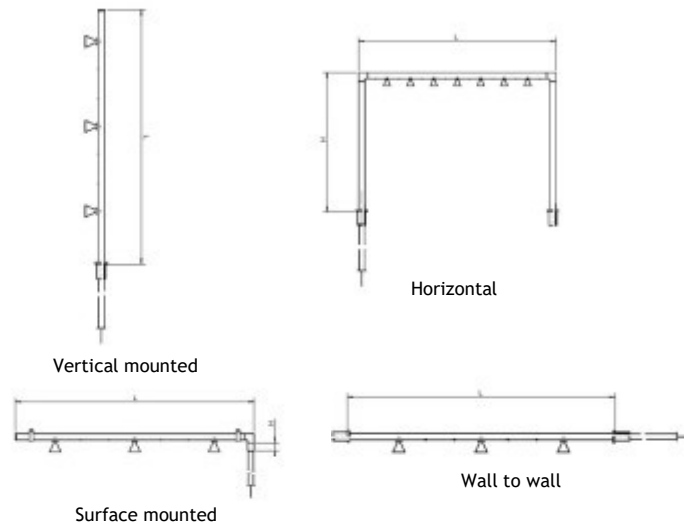

One lighting system, multiple lighting solutions. Choose discreet light points to create uniform light. Choose optical heads to highlight specific objects. Or choose to combine both on one XPO conduit.

Choose light beam angles, conduit finishes and lengths. Tilt fittings in multiple directions and adjust their focus as often as you want. Ideal in showcases, and for product and window displays.

XPO: the surprisingly simple way to design precisely the right light.

## XPO

- For indoor use / dry locations
- Aluminium finish
- Black (others on req.)
- Surface treatment, anodised
- Width and height customised design
- Developed for showcares and museums
- Fibre optical system
